SUMMARY OF CONVERSATION:

I received a cc:mail message from Ida L. Harper-Brown, ISIC requesting that I call Mr. Bean. I talked to Mr. Bean around 5:15 pm. He said that he had called to confirm a quote that he had. The quote was about ladder safety. He read it to me; I said that that was from several years ago and it sounds as if I was reading a Commission publication. Mr. Bean also inquired as to whether I was a Mechanical Engineer. I said that I was a Metallurgical Engineer and Materials Scientist but my current classification is as a General Engineer.

I also told Mr. Bean that for such inquiries the practice is to go through Public Affairs and that he should call Ken Giles at 301-504-0580 x 1184. Mr. Bean said he would do that Wednesday morning January 5, 2000.
