**SUBJECT: ASTM F15.18 Task Group Meetings on Non-Full-Size Cribs**

**LOCATION: CPSC Headquarters**

**DATE: July 7, 2010**

**ENTRY DATE: July 7, 2010**

**LOG ENTRY SOURCE: Patty Edwards**

**COMMISSION ATTENDEES: Patty Edwards, Jacob Miller**

**NON-COMMISSION ATTENDEES: Contact ASTM for attendee lists**

**MEETING SUMMARY:**

A proposal to update ASTM F406-10 was presented by Kitty Pilarz, sub-committee chairman. The proposal was based on the draft NPR presented by CPSC staff and includes revised mattress support impact test, crib side tests, movable side latch tests, and moving the recordkeeping requirements to section 5.0 of the standard, all similar to what is in the full-size-crib standard, ASTM F1169-10. In addition, the proposal included some editorial changes and also specified the test order in a similar manner to what is already in ASTM F1169-10. After much discussion, it was decided that the allowance to re-tighten the screws would also be added to ASTM F406-10. This proposal will be sent out to ballot the week of July 12, 2010.
