- Cabinet light temperature limits
- Tungsten halogen lamp adjacent surface and overlamping abnormal operation tests
- Date codes
- Cabinet light instructions
- Miscellaneous corrections and clarifications
- Temperature Table
- Portable luminaires having play value
- Work light power-supply cord

STP members agreed in principle that some of the proposed requirements be forwarded to the STP for balloting. STP chairman will establish working groups to discuss in details some of the issues before proposals are submitted to the STP for balloting. In addition, there was a discussion of the Proposed Third Edition of the Standard for Direct Plug-in Nightlights, UL 1786. Detailed minutes of the meeting will be issued by UL.
